

MAKE A CLEAN GETAWAY

With the Hose Winder & Hose Drainer ROLLY 5"

Since more than 20 years firefighters all over the world use and love our hose winder series ROLLY. Many customers asked us for winder for 4" and 5" hoselines.

Here it is: the brand new battery powered Hose Winder and Hose Drainer ROLLY 5".

Hoselines with Storz couplings up to 5" in diameter and 200 ft can be wound. The handle and the arm with the hose-guide are foldable to ensure a very small volume of the unit. Thus he can easily be stored in the firetruck.

The forceful electric drive is powered by an exchangeable 28 V battery Milwaukee type or Genesis Rescuetools type, the speed is adjustable up to 4 mph.

The innovative coupling bracket precisely hold the coupling before winding. While the operator fixes the coupling in the bracket the integrated stand helps to stabilize the unit.

The winder advances along the hoseline while winding. Hereby the hoseline with coupling isn't dragged and by this less stressed through abrasion.

An adjustable hose-guide will guarantee a proper winded hose-coil and the water-drain while the hose is winded. After winding the hose-coil can be effortlessly discarded to the back. The coiled hoseline can easily be removed with hose-removal aid.

Technical Specification:

Dimension: 33" x 20" x 14"

Weight: 58 lb

Operating range: up to 1.500 ft with one battery 28 V 5 Ah
